

# HOUSEMATE / NEO

## High pressure systems

A range of 5 'economy' pressure pumps, suitable for applications beginning with water supply to a laundry or garden tap, up to total supply of an average house. Equipped with various controls, they provide versatility, cast iron or stainless steel construction with high reliability at a budget price.

### TT45

Turbine pump with brass impeller, brass removable cover and brass face at rear of impeller for non-sticking.

Available in a 1 litre pressure tank / switch and electronic controller for constant flow in a shower.

### JSL60 / 100

Stainless Steel body with Noryl internals, ideal for a rainwater tank or whole house supply. Flows up to 60 LPM are sufficient for multiple outlets.

### JP60 / 100

Cast Iron body with excellent self priming ability for use as a household pressure pump or general water handling including spear point use.
