

POOLMATE

Swimming pool pumps

A range from .55kW to 1.5kW swimming pool and transfer pumps, construction in glass loaded poly prop. Shaft in stainless steel with double insulation motor. Construction to IP55 protection, class F insulation, epoxy impregnated windings with in built overload protection.

FCP 550/750/1100S2

550-1100 series are for medium to large pools. Rapid priming, quiet operation and flows to nearly 350LPM makes this range the popular home pump.

FCP1500S

1500S series is designed for extra large pools where flows to 500LPM may be required. Extra robust construction to ensure a long working life.

SWP 250

Plastic construction with brass impeller and stainless steel wear plate. Self priming suitable for sea water transfer, Agricultural and industrial water.
